

BeneSmart® 5.0

Online Enrollment Advantages

Are you searching for more efficient and cost effective benefit administration solutions? Find out why employers nationwide are working smarter, not harder, with BeneSmart®, a web-based platform for online enrollment and benefit management built and enhanced by the experts at Benesyst since 1996.

Cost Control

Most organizations face increasing pressure to reduce their benefits expense. Legislative changes with uncertain outcomes significantly complicate long-term strategic planning. Today, most organizations feel challenged to rethink existing business processes and create new efficiencies that offset increased costs. BeneSmart helps your organization to:

- Automate benefit enrollment and administrative functions
- Manage all enrollment and eligibility with your carriers
- Create new and improved financial controls
- Eliminate expensive software license fees and paper-based solutions

Efficiency/Automation

Benefits administration is one of the most labor-intensive activities of the entire Human Resource function. Legal, vendor, payroll, accounts payable, carrier, HRIS and employee requirements together create complex demands that must be achieved without compromising employee satisfaction, financial integrity or over-burdening your team. BeneSmart helps your team to:

- Streamline all benefit management processes
- Consolidate your bills – there's only 1 invoice!
- Provide online support tools for employee self service

Employee Retention & Satisfaction

Providing interactive tools for smart benefits choices is increasingly important in a competitive talent market. As new benefits or programs are introduced, your employees' need for personalized information increases. BeneSmart helps you to:

- Enable employee self-service
- Provide user friendly benefit comparison tools
- Disseminate organization-wide or individualized content, quickly and easily

Compliance

The regulatory oversight of benefit administration is always evolving and creating new, complex and burdensome compliance requirements for employers. BeneSmart helps you:

- Ensure compliance with federal and state requirements
- Inform employees regarding program changes and updates
- Compile and analyze your data with flexible reporting tools

NO SOFTWARE!

The BeneSmart on-demand platform offers complete benefit management automation along with freedom from antiquated installed/licensed software packages, version update costs, programmer fees, consultants' fees and manual benefit administration work. Benesyst is responsible for all updates and new functionality becomes available to all employers automatically.

The BeneSmart system allows your staff and employees to work smarter, not harder, by relieving you of the demands of system upkeep and updating while providing strong financial controls to save you time and money.

BeneSmart – work smarter, not harder

Economic Advantages of BeneSmart 5.0

- No software to maintain
- No upfront licenses or annual maintenance fees
- No “per user” charges
- Automatic upgrades and regulatory updates
- Robust reporting simplifies compliance
- “Go green” and eliminate paper-based enrollment
- Reduce dependence on internal IT resources

Excellence in benefit administration since 1993.

Benesyst: Benefit Management That's Responsive & Accountable

Benesyst is an established, high technology, high performance benefit administration outsourcer. Benesyst is the creator of BeneSmart®, an industry-leading web-based (SaaS) benefit enrollment & eligibility management platform that automates key benefits management processes while equipping organizations with advanced tools to enable strategic oversight, improve bottom line results, and elevate employee engagement.
